Budgetline Shelving

Affordable shelving for every storage need

Robust shelving that fits your budget

If you're looking for adjustable shelving at an attractive price, it pays to consider Budgetline shelving. This robust shelving system is ideal for a number of storage needs. At work or home, you can rely on this system to store your items without exceeding your budget.

Bringing quality and affordability together

With an individual shelf capacity of 50kg UDL (uniformly distributed load) and a total of 250kg per bay, Budgetline Shelving is strong enough to cope with a wide range of items.

The system comes with five shelves and four single piece uprights which provides a rigid and stable structure.

An attractive and accessible system

Budgetline shelving has a pre-galvanised finish and provides a modern appearance to suit most environments. Ingenious corner plates hold everything together without the need for cross bracing, so it's easy to access from all sides.

Assembly

Assembling Budgetline Shelving is straightforward, each pack comes with easy-to-follow instructions and everything you need, including a spanner set.
